

Add On Air Flow Kit with Thermostat for HAMILTON XLR

HAMILTON DRIVE-UP

Kit# E0873-AFK

- Air Flow Kit for *existing XLR units that do **not have** Air Flow Kits installed*
- Air Flow reduces condensation building up in the tubes normally after hours.
- The Air Flow function runs the pressure turbine motor on a larger 24VAC transformer after hours when the system is placed in night-locked mode and temperature drops below set point
- The Air Flow function is suspended when temperatures are above the set point increasing turbine motor life

HA-1000 XLR
