Hamilton's Model 145DB "Drop Box"

Providing a convenient place for patrons and customers to drop off books, tapes or small packages is great for business, but many drop off slots make it easy for thieves to "fish" products back out through the slot. The Drop Box, from Hamilton Safe makes it almost impossible.

Hamilton has been frustrating thieves and bank robbers for nearly a half century, so they know how to make life difficult for anyone interested in making an illegal withdrawal from your business.

Hamilton Safe's Drop Box:

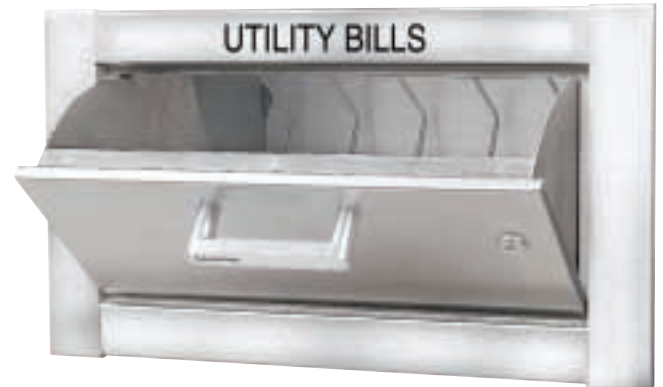

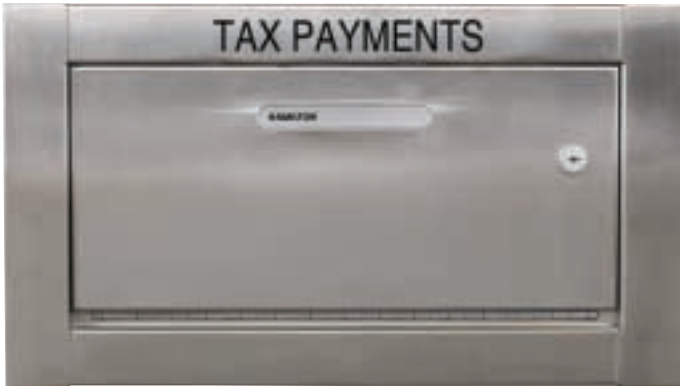

- Provides high security with an anti-tampering design
- Requires little maintenance with a stainless-steel face and drop chute
- Can be customized with any faceplate message
- Can limit access — with key-lock feature

Buy some peace of mind along with customer convenience when you install a drop box — make it safe — with Hamilton Safe's Drop Box.

HAMILTON SAFE

Drop Box

...a secure depository
solution for government,
financial and commercial
applications
