With HA-45, you get:

- **Long-term durability**
 - drive-up unit is fabricated from rugged stainless steel
- **Small footprint**
 - fits almost anywhere and the HA-45 is ideal for any new installation, or for retrofits
- **Whisper-quiet operation**
 - with Hamilton's patented PowerStar remote turbines
- **Blowers and motors**
 - are located in the customer unit. No need to mount in the canopy or isolated area
- **The clearest audio quality**
 - digital audio technology ensures clear uninterrupted communication between the teller and your customer
- **Customer Video Unit**
 - provides clear audio and video communication with customers at remote locations
- **Service access from the front**
 - therefore the back of the unit can be placed against the building

HAMILTON AIR®

Hamilton Air HA-45

Engineered for outstanding reliability and superb cost-effectiveness

HA-45 is engineered to Hamilton's legendary high standards:

- **Maximum teller space.** The low-profile teller terminals allow for unsurpassed line-of-sight visibility.
- **Simple installation.** Only a single tube is needed to connect the HA-45 to a teller station.
- **Exclusive turbine system.** The super-reliable and patented PowerStar turbine system provides maximum load-carrying capacity with lower operating costs.
- **Easy to service.** Components are easy to replace if they become worn or damaged, so there's no delay in keeping your unit operational.
