

# Hamilton: we're a safe company for you to rely on.

You can rely on Hamilton Safe for all of your security and drive-up equipment. We build the industry's most advanced drive-up systems including underground, upsend and high-load capacity commercial systems. We also design, engineer and build U.L.-listed vaults and vault doors, custom and modular safe deposit boxes, teller lockers, night

depositories, bullet resistive windows and many other products to serve wherever reliable security is required.

Our dedication to simplicity of design helps ensure superior quality, reliable performance and affordable prices. If you're planning to invest in new equipment, please give us a call or visit our website. We'll provide high-performance equipment and service. You can rely on it.

# Hamilton Safe

Founded in 1967 by Harvey L. Henkel and Robert "Red" Deluse, Hamilton Safe has grown to become one of the largest security products manufacturers in the United States. With products installed and serviced in all 50 states, and many foreign countries, Hamilton Safe has grown with a reputation for producing products that are innovative and uncommonly reliable.

Hamilton draws upon 300,000 square feet of manufacturing space and a combination of state-of-the art tooling and old-world craftsmanship. For the sake of reliability, simplicity has been the essence of Hamilton Safe product design. While pursuing that design credo, Hamilton has also seen many firsts in the security industry.

## First Domestic Manufacturer to:

- Build a stainless-steel-clad vault door
- Integrate an emergency ventilator with the vault doorframe
- Design and build an envelope-loss-proof, U.L.-listed night depository head
- Engineer and build an "overhead" drive-up system
- Design and manufacture a remote drive-up system using 110v single-phase electrical supply
- Produce and design a night depository that audits deposits through card access and receipt generation
- Innovate and engineer an entrance control system that detects and refuses entry to anyone carrying metal weapons
- Patent, invent and develop a dispensing machine to accommodate commercial volumes of rolled coin and cash

## Good reasons to "Buy Hamilton"

**Product Reliability** – Hamilton's product line is designed to work hard and last longer than competing products. Simplicity of design allows the use of subcomponents that have extraordinarily long wearing time. In fact, over 90% of the components used in our equipment are readily available off-the-shelf parts. The same simplicity and robust construction underwrites lower maintenance and repair costs in the long run.

**Production Flexibility** – Hamilton manufacturing is organized to quickly accommodate custom product requests and to shift production from one line to another as market demands become evident. We do not out-source manufacturing. We operate in an environment where product design, engineering, manufacturing, assembly and management all work together as one team. The result is faster delivery to you for critically needed products.

**Superior Service** – Hamilton relies on a nationwide network of dealers to sell, install, and service our products. Our dealers are local independent business owners and security professionals with their homes, hearts and businesses invested in a community nearby.

**Commitment to Value** – Hamilton delivers the best possible product at the best possible price - whatever it takes.

### We invite you to

...call a trusted professional in your industry who has purchased Hamilton Safe products. Ask about Hamilton's quality and reliability, along with the service received from the local Hamilton dealer. You'll find that our customers are often our best representatives.
